She expressed the importance of the brick streets on Garfield Place and that by action on behalf of the community - all of the brick streets in the city were protected. The houses on the street are all unique with a similar feel and this street was one of the first planned streets in the city. Even more, Garfield Place is the only street in Danville on the Historic Register so we need to protect these historic places.
      ii. Woodrum: Asked if Natasha could get a representative of the engineering department to attend the next meeting. They agreed it would be best to be able to ask questions and express concerns to the proper person at the next meeting. She also asked if the design guide could be sent to the commission
